EDUCATION

Vellore Institute of Technology, Bhopal *Aug 2023 – May 2027*

B.Tech - Computer Science and Engineering | **CGPA: 8.83 / 10.0**

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS), Operating Systems, Software Engineering Principles, Software Development Life Cycle (SDLC)

TECHNICAL SKILLS

Languages: Python, Java, C++ (Basics), HTML/CSS

Frameworks & Libraries: TensorFlow, Keras, OpenCV, Scikit-learn

Tools & Platforms: Git, GitHub (version control & CI/CD), Power BI, Excel

Databases: SQL, DBMS concepts (CRUD, relational models)

Methodologies: Agile, SDLC, Software Requirement Analysis, Debugging & Testing

Cybersecurity: Vulnerability Assessment, Risk Auditing, Nmap, Wireshark

Concepts: Data Structures & Algorithms, OOP, Machine Learning, Big Data Basics, Cloud Fundamentals

EXPERIENCE

Cybersecurity Intern | Symbiosys Technologies *May 2025 – Jun 2025*

- Conducted system audits across enterprise environments and identified 15+ potential security vulnerabilities, documenting risk findings with structured reports aligned to SDLC security practices.
- Analyzed vulnerabilities using Nmap and Wireshark; recommended improvements that enhanced system monitoring efficiency by 20%.
- Collaborated cross-functionally with senior engineers and presented technical findings to stakeholders, strengthening communication and client-engagement skills relevant to large-scale tech teams.

PROJECTS

AI Sign Language Detector | *Python, TensorFlow, Keras, OpenCV, CNN* *Jan 2025 – Present*

- Designed and deployed a real-time ASL recognition system using Convolutional Neural Networks (CNN) and OpenCV, trained on Kaggle and Teachable Machine datasets - achieving 92% recognition accuracy.
- Implemented smart sentence formation with autofill and autocorrect, reducing communication friction for non-verbal users; applied ML model optimization techniques to improve inference speed.
- Led team debugging, testing, and Git-based version control in a collaborative multi-person environment, simulating an Agile software development workflow.

Student Information System | *Python, Tkinter, SQL, DBMS* *Dec 2024*

- Built a desktop application using Tkinter with full CRUD operations to manage student records, integrating a relational database backend and input validation to ensure data integrity.
- Simulated real-world client requirement gathering and software maintenance practices - key skills aligned with enterprise software development.
- Applied software engineering principles including error handling and usability design, reducing invalid data entry by enforcing strict validation logic.

LEADERSHIP & ACTIVITIES

- Editor, EV Club, VIT Bhopal - Reviewed and published technical documentation and write-ups, ensuring accuracy, clarity, and quality for a technical audience.
- Social Media Co-Lead, Pahadi Club, VIT Bhopal - Led cross-functional communication, managed team collaboration, and drove engagement campaigns across platforms.
- Active hackathon participant - applied creative problem-solving and team-based development to build real-world tech solutions under time constraints.

CERTIFICATIONS

- NPTEL: Introduction to Machine Learning - Foundational ML techniques including supervised learning, model evaluation, and data preprocessing.
- Coursera: Bits and Bytes of Computer Networking - Networking protocols, TCP/IP stack, and data transmission concepts.
- Internship Completion Certificate - Symbiosys Technologies, Visakhapatnam (Cybersecurity, May–Jun 2025).

ADDITIONAL INFORMATION

Languages: English (Fluent), Telugu (Native), Hindi (Proficient) **Availability:** Immediate **Graduation:** May 2027 (eligible for 2027 SEP cohort)
